Full-Stack Developer & Systems Specialist | Next.js, Golang, AI Solutions & Linux Infrastructure

Core Skills & Competencies

Web & Backend Development

Next.js · React.js · Node.js · Golang · TypeScript · Tailwind CSS · REST APIs

AI & Agentic Systems

OpenAI API · RAG Architecture · Model Context Protocol (MCP) · AI Automation

Databases & Tools

PostgreSQL · Git & GitHub · WordPress Plugin Architecture · System Monitoring

Linux & Infrastructure

Production Linux · Docker · Nginx Reverse Proxy · CI/CD · SSL · Zero-Downtime

Mobile & Hybrid Apps

Flutter · Capacitor · Progressive Web Apps (PWA) · Android Development

Spoken Languages

Urdu (Native) · Punjabi (Native) · English (Proficient)

Professional Experience

Full-Stack Developer

2023 - Present

Domin8x Digital (via Upwork)

Remote

- Architected and built **AI 404 Redirect**, an intelligent WordPress plugin utilizing AI to analyze broken URLs and dynamically route users to relevant site content.
- Engineered automated content discovery, context-aware semantic matching, and high-performance redirect algorithms with SEO compliance (301/302 headers).
- Developed comprehensive analytics dashboards to monitor 404 events, redirect efficiency, and user navigation metrics.
- Implemented conflict-detection systems with existing redirect plugins and built an intuitive administrative interface.

WordPress PHP OpenAI API Full Stack SEO Optimization

Linux & Infrastructure Administrator

2020 - Present

Self-Employed / Independent Engagements

Gujranwala, Pakistan / Remote

- Administer and maintain production Linux environments hosting high-traffic web applications with 99.9% uptime.
- Configured Dockerized microservices, Nginx reverse proxies, SSL/TLS certificates, and load balancing.
- Implemented automated CI/CD deployment pipelines ensuring zero-downtime releases and automated rollbacks.
- Established server monitoring, security hardening, automated backups, and log management.

Linux Docker Nginx CI/CD DevOps Bash

Cross-Platform Mobile & Web Developer

2022 - Present

Client Projects & Solutions

Remote

- Built responsive cross-platform mobile and hybrid applications using Flutter, Capacitor, and Progressive Web Apps (PWA).
- Integrated secure RESTful APIs, local caching, push notifications, and offline-first capabilities.
- Optimized mobile front-end performance, app startup times, and smooth native device integrations.

Flutter Capacitor PWA Android TypeScript REST APIs

Key Projects

Lead Full-Stack Developer
2023 - 2024

YTGPT — Intelligent YouTube AI Assistant
Remote

- Spearheaded full-stack development of YTGPT, a comprehensive AI platform providing instant video insights, channel intelligence, and media extraction.
- Crafted an intuitive, high-performance UI using **React.js** and **Tailwind CSS** paired with a high-throughput **Golang** backend service.
- Integrated **Model Context Protocol (MCP)** to enable secure, context-aware LLM interactions and multi-step reasoning over YouTube data.
- Built features for automated transcript extraction, channel sentiment analysis, trend tracking, and accelerated media processing.

React.js Golang Tailwind CSS MCP OpenAI API YouTube API

Architect & Developer
2023

AI 404 Redirect — Smart WordPress Redirect Plugin
Remote

- Developed an AI-driven URL matching solution that rescues broken links by semantically discovering and redirecting to relevant existing site content.
- Reduced bounce rates and preserved SEO value through intelligent 301/302 redirection strategies.
- Designed real-time analytics for 404 monitoring, custom redirection override rules, and conflict detection with other plugins.

WordPress PHP AI Matching SEO Plugin Development

Education

Bachelor of Science in Information Technology (BSIT)
2024 - Present

Govt. Graduate College of Commerce
Gujranwala, Pakistan

- Currently enrolled in 5th Semester (CGPA: 2.44 / 4.0) with focus on Software Engineering, Database Systems, Computer Networks, and System Analysis.

Information Technology Software Engineering Databases

Diploma in Information Technology (CIT)
2024

Christian Technical Training Center
Gujranwala, Pakistan

- Completed specialized IT curriculum covering Web Development, Programming Fundamentals, and Hardware/Networking with an exceptional score of **2383 / 3200**.

Computer Information Technology Networking Programming

Matriculation (Science)
2020

St. Joseph's English High School
Gujranwala, Pakistan

- Foundational secondary education in Science, Computer Studies, and Mathematics.

Certifications & Technical Training

Nov 2021	**Go (Golang) Programming (Cert ID: CT-C0OUA7FI)**, Sololearn	*Online*
Sep 2021	**React + Redux Front-End Development (Cert ID: CT-QLO3FHDX)**, Sololearn	*Online*
Oct 2019	**C++ Object-Oriented Programming (Cert ID: CT-9TZB1LUY)**, Sololearn	*Online*
